

# AUREA 115

This two-way shallow (27cm. (10") depth) cabinet screen system is suitable for small cinemas up to 125 seats.

Despite its small size the quality is superb. With its new internal crossover and improved treble driver it achieves constant directivity and very low distortion for every seat.

It works together with our AUREA 6118 subwoofer.

This system has a polyurea finish.
