

AUREA 2006 V2 THX

This state of the art system is designed for any kind of cinema where the highest quality is a must. As this is a **HIGH-POWER surround system**, is the perfect solution for medium/big cinemas and Immersive Systems.

For this application, the **AUREA 2006 V2 THX** is ready to be supported in wall or ceilings with included U bracket or our optional Aurea 7712 Support.

This perfect internal processor enables the technician to EQ in a wider range of frequencies with a friendship work.

Because of the improved quality of the sound in the cinemas it's today very common to fit the surround channel with subwoofers, not only for Immersive Systems, but also for goods 5.1 and 7.1 installations.

For this reason, we are offering our Aurea 7517V2 SUB or our Aurea 954 V2 THX to work with our Aurea 2006 V2 THX.

A **polyurea painting** finish with a fabric front adapts the **AUREA 2006 V2** to any cinema decoration.
