

AUREA ARQ. 06 V3

Our Architectural series is meant for forums, cinema foyers, etc. But many customers find the **AUREA ARQ.06/V2** to be good looking, so it is becoming more of a nice surround used at medium/small cinemas than for any another application.

The wall support, an U bracket, is the standard supporting system. It is also ready to receive the standard Midimount and be hanged vertically.

So, depending on the styling of the cinema decoration, our **AUREA ARQ.06/V2** can work in a horizontal or vertical position.

As all of the AUREA Speakers, the unit is painted in the strongest existing painting system: **the polyurea.**
